

Jesus by Hannah Muelu

Jesus is our saviour and the one who heals us. He is the one who created us and created all of the animals in the whole world. He is the one who really loves us more than our parents but our parents love us too. Jesus has many disciples that love him with all of their love and heart also they obey him. Jesus has done many miracles like he made a blind man see and he knows where lots of fish are and where less fish are in the ocean. Jesus was also a teacher and teaching about how much god loves you with all of his heart. Lastly even though Jesus is not here on earth he still heals people like Talo and Emme also he heals poor people and broken people.
