

# **STOP FREE SCHOOL LUNCHES**

## **Introduction**

Do you eat the lunches that are given to the school? Well I don't because I strongly believe that the lunches that are provided are a waste of time. So in this persuasive writing, I will state 4 different reasons on why we shouldn't have any more free school lunches!

## **Paragraph 1**

Firstly, the taste is unpleasant and most students dislike the taste. The taste needs more seasoning and flavourings. The truth is, many students don't eat it! Every student deserves to have better flavourings in their food, so it is important that students get treated with better nutritious food and more tasty meals.

## **Paragraph 2**

Secondly, when kids don't eat their food it gets thrown away into the bin. That means it is a waste of time making lunch for kids who don't even eat the food. This causes a lot of waste and a waste of resources by prepping lunch that is not going to be eaten. Together we can encourage the government to use the lunch money for better opportunities like playgrounds or better free programmes at school.

## **Paragraph 3**

Next, students with allergies like peanuts, dairy, or meat would probably have an allergic reaction to the ingredients that have been put in there. Imagine if we didn't have that problem. Well by avoiding the problem, we need to get rid of or improve the school lunches.

## **Paragraph 4**

In addition, instead of free lunches we can go buy cheap snacks at Pak'n'save or Woolworths. Buying your own food does not cause problems at school and you

don't have to go hungry at morning tea or lunch time. This will also help the students and parents to be responsible for their school lunches.

### **Conclusion**

In conclusion, I strongly believe we should no longer have school lunches because of the taste, wastage, allergies, and tax payers money going to waste. So we should encourage the government to stop free lunches and use the money on something that will definitely not go to waste like free stationery.
